

## **IMMEX Problem Set Design Prototype**

**Problem Set in Progress:**

**Authors:**

In preparation for the technical construction of your problem set in Dreamweaver, compose a brief sketch of how you would like your opening page (index page) to look like. At a minimum, you be sure to illustrate: (1) how frames will be positioned on screen; (2) the positioning of primary menu items; (3) the positioning of sub-menu items; and (4) the area of the screen in which information will be presented to students.
